Qwen T1: SELECT
idea entropy (bits, Miller-Madow)
steering strength alpha (x median residual norm)
d_away calibration (n=30)
random draw (5/strength)
random draw mean
targeted d_away
targeted re-draw
off-target real vector
Qwen T2: SELECT
idea entropy (bits, Miller-Madow)
steering strength alpha (x median residual norm)
Qwen T1: SELECT
max non-mode share
steering strength alpha (x median residual norm)
Qwen T2: SELECT
max non-mode share
steering strength alpha (x median residual norm)
